

Dylan Bruce

📍 Atlanta, GA ✉ dylanbruce.cs@gmail.com ☎ 404 263 8386 🔗 [linkedin.com/in/dylangbruce](https://www.linkedin.com/in/dylangbruce)

Education

Georgia Institute of Technology

B.S. in Computer Science, Minor in Mathematics

Expected May 2027

Atlanta, GA

- **GPA:** 3.92/4.00
- **Activities:** Big Data Big Impact @ GT, WebDev @ GT, Boulderling

Experience

Software Engineer II Intern

Walmart Global Tech

May 2026 – Aug. 2026

Bentonville, AR

- Developed a full-stack operational dashboard using Next.js, Tailwind CSS, and Java Spring Boot to consolidate disjointed Enterprise Inventory (EI) data pipelines
- Reduced data latency and improved access times to EI systems by 50% on average
- Designed CI/CD pipelines using Maven and LooperPro (internal pipeline orchestrator) to automate packaging, reducing from 4 manual Kubernetes deployments to 1 automated deployment
- Deployed 2 containerized backend and frontend services onto Walmart's cloud platform (WCNP), maximizing dashboard uptime and reliability for the EI team

Software Engineer Intern

MathWorks

Jan. 2026 – May 2026

Natick, MA

- Expanded total C++ test coverage across a multi-million-line legacy codebase by 1%, utilizing a CMake-based CI/CD workflow to quickly investigate and resolve test failures
- Created 12+ reusable GenAI "skills" to guide test generation, improve test buildability, and align with internal testing conventions
- Accelerated test coverage efficiency by 50% by designing agentic GenAI workflows that leverage iterative generate-build-fix loops to automatically correct test failures

Machine Learning Researcher

Georgia Tech VIP Aquabots: Marine Robotics

Aug. 2025 – Present

Atlanta, GA

- Increased InceptionV4 CNN model accuracy by approximately 10% through enhanced preprocessing and data normalization for plankton image classification
- Collaborating with a multidisciplinary team to develop and evaluate advanced preprocessing pipelines for underwater imagery

Teaching Assistant - Linear Algebra / Discrete Mathematics

Georgia Tech Department of Mathematics

May 2025 – Present

Atlanta, GA

- Led instruction and review for 1,000+ students in Linear Algebra and Discrete Mathematics, covering proofs, vector spaces, matrices, and algorithmic complexity
- Mentored students in rigorous problem-solving, boosting exam performance by ~10%

Projects

FishCast - Climate-Fishery Forecasting

May. 2026

- Analyzing climate and fishery datasets using RNNs (LSTMs) in PyTorch and Python to forecast shifts in marine species distributions
- Collaborating with a cross-functional team to develop ML models with Georgia Tech PACE Supercomputing

News2Lang - Context-Aware Language Learning Platform

Sep. 2025

- Developing an AI-powered language learning platform with WebDev@GT to use NLP and LLMs to extract phrases, highlight context, and provide simplified explanations
- Building application with Next.js + Tailwind frontend, Supabase backend, and OpenAI Integration

Technical Skills

Languages: Python, SQL, C, C#, Java, JavaScript, TypeScript, HTML/CSS, C++, MATLAB

Tools/Frameworks: Git, Docker, Firebase, React.js, Next.js, Kubernetes, Azure (CosmosDB), Android Studio, LaTeX, Jenkins CI/CD, Apache Airflow, Artifactory, Claude Code, Maven, Homebrew, Akeyless

Machine Learning: TensorFlow, XGBoost, scikit-learn, Keras, Pandas, Matplotlib, Seaborn, NumPy, Excel

Technical: Data Structures, Object-Oriented Programming, Optimization, A/B Testing, Agile/Scrum
